Opioid Settlement Assistance Program

Goals

To assist and support NC counties in planning for and utilizing national opioid settlement funds, managing strategic health initiatives, and maximizing resources through outreach, education, and collaboration.

Supportive TA Services

Strategic action planning

- Prioritization of evidence-based strategies
- Legal consultation/translation

Collaboration and Connections

- Connections to technical experts
- Fellows and Special Project Coordinators

Program implementation support

- Education and training
- Consultation and coaching
- Outreach
- Evaluation and data reporting
- Preparation of financial reporting

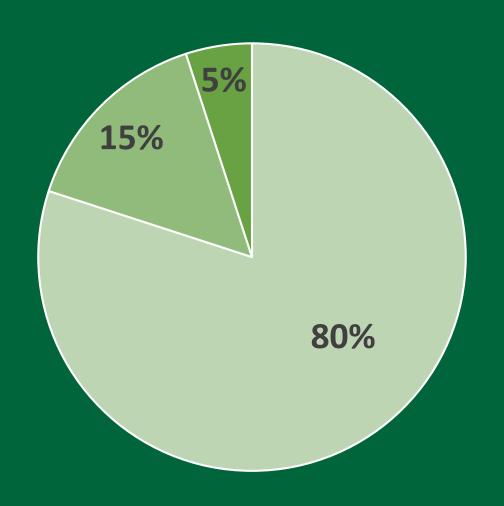

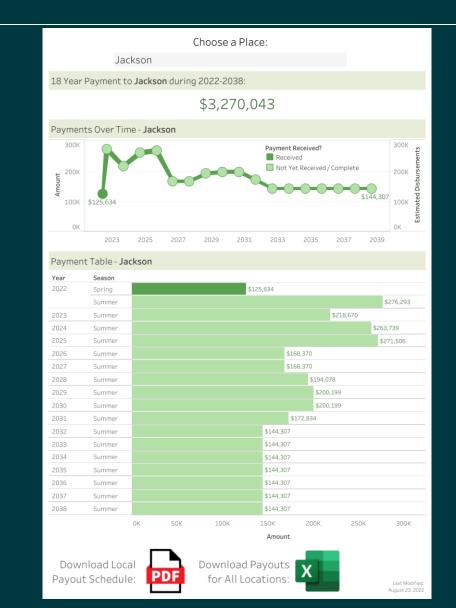

North Carolina Association of County Commissioners Allocation Model

- Opioid settlement funds received in NC will be allocated as follows:
 - 80% will go to Local Governments listed in the MOA
 - 15% will go to the State of NC
 - 5% will be used for County Incentive Fund

18 Year Payment Schedule

MOA Guiding Principles

- 1. Spend the money to save lives
- 2. Use evidence and data to guide spending
- 3. Invest in prevention of root causes
- 4. Focus on equity and populations disproportionally impacted; Include people with lived experience
- 5. Transparency and Accountability
 - Fair and transparent process for deciding where and how to spend the funding

Remediation Strategies

MOA offers local governments two options

One or more strategies from a shorter list of evidence-based, high-impact strategies to address the epidemic

One or more strategies from a longer list of strategies after engaging in a collaborative strategic planning process with diverse, local stakeholders

NC MOA: High Impact Abatement Strategies (Option A)

1. Collaborative strategic planning

2. Evidencebased addiction treatment

3. Recovery support

4. Housing

5. Employment

6.Early intervention

7. Naloxone

8.Post-overdose response

9.Syringe service programs (SSPs)

10.Legal system diversion

11. Addiction treatment for incarcerated persons

12. Reentry programs

1. Collaborative strategic planning

 Undertake a structured process to identify the best strategies for local governments to fund to address identified needs

 Get input from representative groups and diverse experts – including from people with lived experience

2. Evidence-based OUD treatment

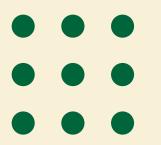

- Only an estimated 10% to 20% of people with opioid use disorder are receiving any treatment at all
- **GOAL:** Increase access to Medications for Opioid Use Disorder (MOUD)

2. Evidence-based OUD treatment

- Improve patient survival
- Decrease overdose, withdrawal symptoms, transmission of communicable disease
- Decrease illicit opiate use and other criminal activity among people with substance use disorders
- Increase patients' quality of life (e.g. ability to gain and maintain employment)
- Improve birth outcomes among pregnant people who have substance use disorders

Methadone

Buprenorphine

Naltrexone

3. Recovery Support - Drivers of HEALTH

Access to Care, Services

Labor/employment

Transportation

Happiness, Belonging (Q of L)

4. Recovery Housing

- Housing First is a policy that offers unconditional, permanent housing as quickly as possible to people who are unhoused and other supportive services afterward
- Substantial evidence that Housing First is both an effective solution to homelessness and a form of cost savings
 - Reduces the use of public services like hospitals, jails, and emergency shelter
- ALSO: Emergency rent and utilities assistance

5. Employment Support, Training, HR Policies

 Fund programs offering employment support services to people in treatment or recovery, or people who use drugs, such as job training or assistance with transportation needs

 Work with Chambers of Commerce and businesses to support employee wellness and job training programs

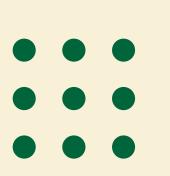

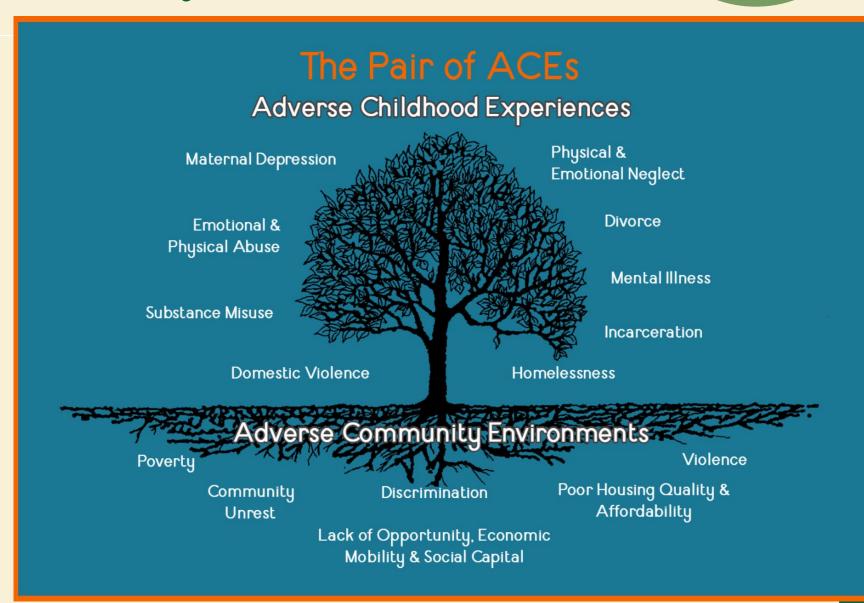

6. Early Intervention

Risk Factors, Root Causes

Trauma is the gateway to drug use

Help young people who may be struggling with drug use

8. Post Overdose Response

- PORT or Quick Response, Rapid Response Teams
- **Goal**: Keep people safe, Crisis response
- Harm Reduction/Peers + EMS/ED
- Connections to care and referrals

Post-overdose interventions should be enticing, respectful, collaborative, and work on cementing that connection between people who use drugs and services that can help them survive.

~ Maya Doe-Simkins

9. Syringe Services Programs

- Legalized in NC July 11, 2016
 - Any governmental or nongovernmental organization "that promotes scientifically proven ways of mitigating health risks associated with drug use and other high risk behaviors" can start a SSP
- Evidence-based (7x more likely to connect to treatment)
- Cost effective:
 - \$0.10 unused syringe vs. \$100,000 for HCV treatment/person

10. Criminal legal system diversion programs

- NC jails most common mental health treatment provider
- Diversion programs provide an alternative to incarceration for people with mental health and substance use conditions who come in contact with law enforcement and the justice systems, and connect them to treatment, recovery support, or other services and supports

10. Criminal legal system diversion programs

- Pre-arrest diversion programs
 - E.g Law Enforcement Assisted Diversion (LEAD)
- Utilizes officer discretion: Additional tool
- Harm reduction framework
- Public health approach
- Cost-savings
 - 60% reduction in CJ involvement in first 6 months
 - 58% reduction over 2 year evaluation

Identification

Screening Process

Connection to Case Manager

Referral to Services

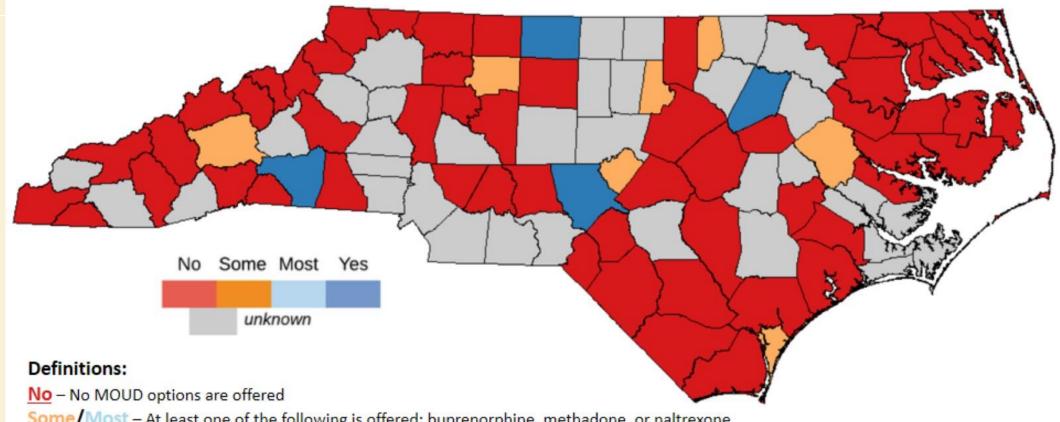

11. MOUD in NC Jail Settings

<u>Some/Most</u> – At least one of the following is offered: buprenorphine, methadone, or naltrexone <u>Yes</u> – Multiple options for MOUD are offered, including buprenorphine, methadone, and naltrexone

*Providing access to MOUD (formerly known as MAT) in jail settings can reduce overdose risk, post-incarceration illicit opioid use, criminal behavior, and infectious disease (e.g. HIV, HCV) risk behaviors.

Source: Qualtrics survey to all Local Health Directors – January 2020 Analysis by Injury Epidemiology and Surveillance Unit

12. Reentry Programs

- Reentry programs connect people to social and health services as they are being released from incarceration, and support them as they re-enter society
- Upon release, individuals are frequently without housing, employment, health insurance, or access to healthcare services
- UNC Formerly Incarcerated Transition (FIT) Program
 - Connects those with chronic disease, mental illness and/or substance use disorder with appropriate healthcare services and other reentry resources
 - Community Health Workers
 - Programs in Durham, Orange, Wake, Mecklenburg, Guilford
- FIT Connect
- Connect people with chronic disease to a medical home upon release
 - E.g. via telehealth, or with FQHCs

12. Reentry Programs Opioid Overdose Deaths Among Former Inmates in North Carolina, 2000-2015

- Opioid overdose death rates 40 times higher than general population during the first two weeks after release
 - 11 times more likely to die 1 year after release
