

Section 11.2 Definitions

Formatted: Underline

Cryptocurrency Mining

The operation of specialized computer equipment for the primary purpose of mining one or more blockchain based cryptocurrencies such as Bitcoin. This activity typically involves the solving of algorithms as part of the development and maintenance of a blockchain which is a type of distributed ledger maintained on a peer-to-peer network. Typical physical characteristics of cryptocurrency mining include specialized computer hardware for mining operations as well as equipment to cool the hardware and operating space. For the purpose of the associated regulations does not include the exchange of cryptocurrency or any other type of virtual currency nor does it encompass the use, creation, or maintenance of all types of peer-to peer distributed ledger.

Renewable Energy

Any facility or installation such as a windmill or solar collecting or concentrating array, which is designed and intended to produce clean energy from natural forces such as wind, water, sunlight, or geothermal heat, or from biomass, for onsite or offsite use.

Small Scale Animal Processing Facility

Structure(s) that do not exceed a total of 10,000 square feet in size where livestock is slaughtered and prepared for distribution to butcher shops or retail sales establishments. A small scale animal processing facility is designed to accommodate the confinement and slaughtering of live animals and may include packing, treating, storage, or sale of the product on the premises. This definition specifically excludes slaughtering and processing activities performed for personal use only.
