Subject: JCARC - Energy features

Don,

As requested, here is a list of what we would consider energy efficient features of the new Animal Rescue Center:

- LED Lighting throughout
- Automatic lighting controls using occupancy sensors for interior lighting and photocells lighting control panels for exterior
- Use of methane gas from existing landfill for building heat, domestic hot water, and radiant flooring heating
- Energy efficient HVAC equipment
- A number of low flow plumbing fixtures
- Energy efficient building envelop including glazing and wall assemblies
-

Let us know if this is not what you're looking for.

Best,
Cary
