Mr. Dillard

The Canada Volunteer Fire Department would like to formally submit this as our request for consideration for the upcoming available Toyota truck.

In August 2015 our department became certified light rescue. In July 2017 we lowered our insurance rating from a 9s to a 5/9E. We are continually working to improve our department in order to provide the best service possible for our community. We believe that this truck would be a great asset to our department to assist in attending additional training required for rescue, along with our standard fire training. It would also alleviate the use of our emergency vehicles that are not necessary for some scenario responses. This vehicle could also be used as a command unit and for responding to calls where we are requested to provide additional manpower versus rolling out our heavier trucks.

We appreciate the opportunity to submit our request to be considered for this valuable addition to our department and can assure you that it would be used to greatly enhance our goal of better community service.

Thank you.

Dustin Nicholson
Chief, Canada Volunteer Fire Department

Gentlemen,

Any department wishing to request Michael's Toyota truck after it has been replaced needs to send a letter of request to my attention please. I will forward these request to Mr. Adams.

Thanks,
Todd

CASHIERS, NC 28717

To whom it may concern:

We would like to request to receive the Fire Marshals Vehicle when it is retired. It would be extremely beneficial for our rescue squad. We are in need of a truck like this for pulling trailers with our ATVs for searches and rescues. The vehicle would also be used for transporting personnel to and from rescue scenes. We have crash trucks and other vehicles but those are for specialized rescue situations. Where this could be used in where it is not ideal to take the specialized vehicles on extended rescues.

Thank you for your time and consideration,

Jeff Stewart
